VOLUME XLVIII. WEDNESDAY, JULY 11, 1888—TEN PAGES. PRICE TWO CENTS

ACTED LIKE A REAL MAN.

Charles Miller, the Accused, Who Was Not Convicted on a Plea of Insanity.

Charles Miller Who Had Shot Two Men Sentenced as a Man for Years in Cook County Jail—Locked in a Cell with a Man for Whom He Has Had Any Supposed—How the Shooter Was a Woman—Changing Clothing at Fort Madison Penitentiary—Locked Up Again.

Sioux City, Ia., July 10.—[Special.]—Charles Miller, the woman who was sent from here to the penitentiary for manslaughter, for killing Frank Smith, and who was pardoned by Governor Larrabee after serving two years, arrived in this city last night, and is now stopping at the Hotel Garretson. Miller is a woman, and has been known as such during the entire time she has been in the penitentiary, and also while she was in jail here awaiting trial. She is about 30 years of age, and has been married twice. Her first husband was a man named Miller, who died about seven years ago. Her second husband was Frank Smith, who was killed by Miller in a saloon in this city on the night of Jan. 1, 1887. Miller was arrested, tried, convicted of manslaughter, and sentenced to two years in the penitentiary. She was taken to Fort Madison, and served her time. She was pardoned by Governor Larrabee, and arrived in this city last night. She is now stopping at the Hotel Garretson, and will remain here for a few days. She is dressed in male attire, and has been ever since she left the penitentiary. She says that she has been treated very kindly by the officials of the penitentiary, and that she has no fault to find with them. She says that she was locked up in a cell with a man for whom she has had a supposed dislike, and that she was compelled to change clothing with him

THE "Q" CONSPIRACY CASE

ARREST OF CHARMAN RICE AND WIDOW AND TWO CLERKS.

The Latter Clerks and Russian Papers Connection with the Pierce Freight-Bidding and Smith Star Mail Contracts Which Have Who Made the Contracts and Who Pocketed Scrip—Further Developments Awaited.

The most important piece of news to the Washington congressional and committee was the confession of John J. Daly and John A. McGarvey clerks, respectively, in Chairman Rice of the mining engineers' Expenses Committee and Chairman Bergen of the Financial Committee. Rice and Bergen were arrested yesterday morning by Daly and McGarvey were not true, to spell until later in the day, as told before. That they have told enough to establish clearly the connection of the two Chairmen with the circular sent out to solicit engineers to come here and secure work on the "Q" for the purpose of checking up engineers, and to strong enough evidence of conspiracy to convict both men.

"Daly and McGarvey have arrested this afternoon," said Inspector Bonfield late last night. "When arrested they sent for me. I went to see them at the armory, where they had been taken, the sending word to Chairman that I presumed they wanted to talk. He came over, brought Attorney Cullop with him. We remained with them. They appeared to be even pulling men, intelligent and willing. They told us Daly of their connection with the matter. Then, on the result of the conference, they wrote out all they knew, and I can say that their statement was perfectly satisfactory to Mr. Bonfield and Mr. Cullop. I had to report before the statements were fully completed, but understand that their entire satisfactory and formed the possibility of a doubt in the statements of the two men against whom they testified. It was getting late, and I left the matter in the hands of Mr. Cullop, who remained with them."

"According to the statement," continued the Inspector, "Chairman Rice [illegible] engineers who went to the different divisions of the engineer corps, urged engineers who wished to hold successful there to solicit [illegible] such a course would be more to their interest. Rice would [illegible] a number of these circulars, which were to be sent out from Washington, asking [illegible] by the corps of Engineers. The circular was to be sent out to the Eastern States [illegible] of right. Letters addressed to Chairman Rice and to the Eastern States were taken to [illegible] and left at the Eastern States [illegible] Chairman Rice. Rice [illegible] Bergen [illegible] Bergen [illegible] Rice's instructions."

"Have you those men now?"

"They are not in any reality, but have given [illegible] satisfactory assurance of appearance."

[illegible] statements were clear and explicit, and [illegible] Clerk [illegible] and gave an account of their connection with the circulars in the handwriting of the suspected individuals [illegible] the documents, and were signed and sworn to before a notary public. [illegible] here to say to that they are satisfactory to Mr. Bonfield and myself."

[illegible] nothing question of either Rice or Bergen, and [illegible] Bonfield [illegible] Rice [illegible] Bergen [illegible] Rice [illegible] Bergen [illegible] Rice [illegible] Bergen

WEDNESDAY, JULY 11, 1888.

The lumber market was a shade firmer at $12 per M., with increased enquiries for boxes. Local consumers continue very fairly active, especially in pine. The cedar market was firmer, with good buying of the cheaper qualities, and prospects.—The Chicago produce markets were weakened by the Government crop report, but not with good buying at the decline. Provisions were dull and lard weak. As compared with Monday pork and barley closed unchanged, lard 7½c more bought, corn 1½c more seller, wheat 2c more seller for next month, corn nearly 1 cent higher, and flaxseed unchanged.

Rain storms are said here to have in Philadelphia for one month, such the Press of that city, and "the last month in succession—enough to cut down the sale of liquor, multiply glass fronts three times, ten be cancelled without dividend, and greatly lessen the appetite for beer and sports." All the advantages of this are not on the side of moral reasoning. Each it would be just about the time of Dr. Depew Pusey Kelley, who represents part of the Quaker City in the National House of Representatives, and the Prohibition party platform makers permit and the weather not be excessive. For, in the words of Mr. Blaine, the repeal of the whisky tax "would do away with income to all the State."

The war between the German physicians and Dr. Koch seems to be the latter's triumph. Queen of the late Emperor and her real cause of his death goes on apace and grows in intensity and bitterness. The report which the German physicians have drawn up affirms that more than a year ago they suspected the disease to be of a dangerous nature and have since to operate not view it from that point of view, when Dr. Mackenzie, who was called in, declared it was not, and refused to associate and evidently to operate his assistance, even in the extreme of delaying persons of the Emperor's house which were confirmed. Of course Dr. Mackenzie will reply to the report, denying everything, and the English doctors will side with him. This is treatment an international war of Europeans which Brandeis begin so luminously.

The Washington Agricultural report for this month, issued yesterday, seems to warrant the expectation of about 450,000,000 bushels of wheat, 1,800,000,000 bushels of corn, and 750,000,000 bushels of oats for the crops of the United States this year. Each of these is a large increase—that in wheat over the estimates of a few months, and for the other two over the officially estimated yields of last year. There is, however, room not only for a wide divergence from these figures between now and the time when the returns are all gathered in, but also in regard to final results. The possibility of large error in any estimate is strongly indicated by a comparison of figures made on the ten previous wheat crops of the United States. Mr. Dodge makes that of last year to be only about 1,300,000 bushels less than the one next preceding it, while the estimated total shows a difference of no less than 40,000,000 bushels. In other words there is a discrepancy of about one-seventh part of the entire crop to estimated. And if such a wide leeway of uncertainty of results is possible in the case of the wheat crop, that for the other cereals must be even a wider one, on account of the greater difficulty of gauging track of them. It is not intended here to assume that the statements is at fact. It is an open question, on which people in the grain trade are divided, as to whether or not to bear the last. In one with the many guesses and the precise statements of fact that are at the command. But it is evident that the great mass of the citizen who are interested in the magnitude of the crop, and the many who trade more or less on those estimates, should be able to take them at something like their true value. They should be regarded as rude approximations at the best, and even the best likely to be wrong to the extent of 10 or 15 per cent because they are not essentially aimed to subsequent reports. For anything that is now absolutely known, the wheat crop of last year may have nearly 50,000,000 bushels more or less than the quantity stated in the latest report concerning it, and that of this year may be 50,000,000 less or several millions greater than the one of yet.

Mr. Parnell has by his counsel for a preliminary committee to inquire into the charges brought against him from the oath evidence of the Lord Justice's court by the Very Attorney General, Webster, placed himself right before the impartial public of England once again. It was not to be expected that the Attorney General would accept Parnell's challenge to place Parnell on trial on the charges for Webster on every made against the first leader. But if Webster has not proof at all to sustain him he will not fail to send Mr. Parnell before a committee of their constituent members. The Attorney General must have sanction advantages before such a committee. It would be selected by the Tory Speaker. A majority of the members would be Tories. The Attorney General would have the services of Justice Castle to draw up the testimony such as it is. He would have at his disposal, or almost such another arsenal, of Tories and other Irish informants to fall back on. Mr. Parnell would have no witnesses but himself and his colleagues to produce before the committee. It does not seem the appearance of complicity on the part of Mr. Parnell with any of the Irish crimes, for Richard Webster's case should be regarded as proved in England and the virtuous of the prosecution of Parnell by the Times and the Tories would be unanimously applauded. But it is not likely that the Tories will grant the inquiry. Mr. Parnell made a

Rejected communications cannot be returned unless accompanied by stamps for that purpose.

Entered at the Post-Office at Chicago, Ill., as second-class matter.

THE TRIAL REVIVALIST DOCS.

A correspondent of The Tribune asks forcibly: "What is the use of talking about tariff or free trade, prohibition or free liquor, until we can be assured of a fair election?" The Tribune commends this statement to another Republican correspondent, who declaring his opposition to any combination of the whisky tax as well as to the alternative proposition for higher tariff taxes to prevent incursions, inquires whether it can be successful one duty to support the Republican party in such emergencies as the present occasion. The question that overshadows and averts all others is that of a fair ballot and an honest count at Congressional and Presidential elections in all the States. On this issue the Republican party is right and the Democratic party wrong. Indisputably wrong. Dr. Republican, however associated with the tariff plank in any other in the Republican platform, has also with the Democratic party without giving its influence to get a pure ballot and honest count. Democratic success in this matter is impossible, except by wrongful methods. Democratic success in this matter is impossible, except by wrongful methods. Democratic success in this matter is impossible, except by wrongful methods.

The fact and free elections in the South the Republicans would have three or four of the eight Congressional districts in Alabama; three, at least, of the ten in Georgia; five of the seven in South Carolina; one more in Tennessee; one of the two in Florida; five of the seven in Mississippi; and three of the six in Louisiana. A fair ballot and an honest count would give the Republican party the Senators from Tennessee, South Carolina, and Florida, and an equal chance in Louisiana and Alabama. By disfranchising hundreds of thousands of voters in the South the Democratic party has secured at least twenty in the House of Representatives and six or eight in the Senate. Fraud has seized the Presidency and stolen two seats on the Supreme bench. Claiming representation in Congress and in the Electoral College for the disfranchised voters, the ballot of no Republican in many places in the South is worth for value as much as that of a Turkish ass in the government of the country.

The wrong is not simply one against the negroes, but against every white man in the South as well. By disfranchising, colluding, and defying the constitutional amendments which were intended to secure every voter the right to cast a ballot in a Federal election and have it counted, the evil of the one party has been augmented, political power in Congress usurped, and Grover Cleveland made President.

The Democratic party plays with fearful fire and misuses power by defying the laws of the land. Nothing can be more certain than if a dishonest ballot and stuffed ballot-box are to be made the price of political success popular government in this country will soon be tampered to an open crime and be overthrown.

With a terrifying anxiety intensified below the Mason and Dixon line, reputable Democrats must see and realize the enormity of organized outrages against the ballot, and any Republican who is desirous for economy and honest government will with success by voting to attain that party to power? Just as long as the Democratic party can brought by fraudulent voting political corruption in the South will continue. The hundred and fifty thousand intelligent, American citizens in Dakota and the fifty thousand in Washington Territory will be barred out of the Union altogether, and denied by a usurping minority the right to any voice in the government of the country. Every Democrat knows that one arises will be ascertained without any regard to right or justice, but solely in the interest of an organization that misused power by fabricating fraud and is determined to retain it by the same method.

Whatever be failing may be in regard to the tariff plank or other the subordinate issues, no Republican who believes in an honest ballot and the fair vote of the majority can give sympathy or support to the Democratic party at next fall's election.

CLEVELAND'S TERRITORIAL APPOINTMENTS.

The Democratic National platform adopted at Chicago in 1884 declared as follows:

"The selection of learned officers for the Territories should be restricted to citizens previously residents therein."

The Democratic National Convention at St. Louis last month reaffirmed the platform of 1884, including the plank above quoted, as a matter of course. The result has been habitually vicious by President Cleveland since his inauguration, and no sooner Democratic to ponder to its relative merits, standing in the conference on record. With hardly an exception the Federal officers of the Territories have been selected from among the non-residents of the States, mostly from New York. This course has given great dissatisfaction in the Territories, but, as the residents thereof have no voice in the selection of a President, Cleveland keeps on his course ignoring their wishes and ignoring the Territorial officers at the request of political managers and organizations which were not to be offended.

The following list of nominations sent by the President to the Senate Monday will indicate the line of his policy and show how carefully he ignores the platform of his party when it suits or serves his purpose:

Ashley Gardner of New York, to be Chief Justice of the Supreme Court of the Territory of Utah.

James M. Dodd of Tennessee, to be Associate Justice of the Supreme Court of the Territory of Utah.

Wyatt M. Wise of Pennsylvania, to be Chief Justice of the Supreme Court of the Territory of Dakota.

Richard Rust of Kentucky, to be Associate Justice of the Supreme Court of the Territory of Dakota.

James H. Bradley of Iowa, to be United States Attorney for the District of Alaska.

Mr. Gardner, who has been nominated for Chief Justice of the Territory of Utah, is an almost unknown New York lawyer whose chief recommendation, a memory, is that he is a member of the Tammany Hall committee, whose partisan support Mr. Cleveland wants and never did owe. To make way for this obscure attorney Judge Dana Dunberry of the Utah, who has been Chief Justice of Utah, is ordered to the more delightful one of Dakota, who have had good reason to dislike his views, manners, and influence in administration of the Edmunds anti-Polygamy law.

The other land appointments were one of the most inferior makeup, as Bradley, the Democratic would have had no difficulty in finding one Democratic lawyers in the Territories for which they were named as Judges.

The appointments are not only in violation of the pledges of the Democratic party, but they are in violation of the spirit of that civil-service law of which the President is selected by the organization to be a worthy and conspicuous exemplification.

MR. JOHN FOX FINDS MONEY AND FREE TRADE.

Rather Mr. John having received such advice as he is supposed to be interested in the Anthracite Basin Trade, where he has lectured and wrote for a reported consideration, has come West to perform the duties assigned to him as an apostle. Democratic. Though he did not take the platform Monday evening to his city the views Democratic speech which he uttered at the hotel to the King of an audience a week more than the average rate of $50 per lecture to the company. It has not failure to the cure of the Democracy to go but it is not highly edified and has rarely betrays the Democratic South and enemies of the Known evangelist. It is exceptional benefit to see the face of a Democratic Pathfinder. Convention are rarely here and Mr. John reports the dearth which has been largest that have ever been convening in the East was the occasion to his convictions were under the influence of liquor, though the other fancy of those stories has been frequently proved, and the priority good order, and general harmony of the conventions have been testified to by men of acknowledged rank and integrity—ministers of the Gospel like Bishop Foster of the Methodist Church and others of world-wide high character. But Mr. John knows that is expected of him by his employers.

Whatever the motive or the inducement there can be no doubt on reading his interview that Mr. John is actuated by the most patriotic to the interests of the Democratic party. The whole interview rested that which to him is the free whisky plank of the Pacific Slope platform is at the nature of a Democratic to every speech. When he comes to contrast the moderate and economical free whisky declarations of the Indianapolis Convention with the boisterous of the Chicago Republican Convention in favor of the repeal of the tax on spirits as an alternative or contingent proposition he is hypocritical and dishonest. He knows at the same time that the Indianapolis platform declares as follows:

"The Republican party in National Convention assembled acknowledges a moderate tariff as the source of all order in government, as tending to revenue.

"2. For the immediate abolition of the internal revenue taxes upon tobacco and whisky, the principal subjects and greatest burdens."

While accepting this as all in principle necessary purpose, in the cause of security to promote to be accountable by the needs expenditure of account wisely to the Republican platform. Like the Pacific of that to it, he also proceeds to be elected by the vote that the Government collects a tax on whisky. It is a partisanship between the whisky makers and the Government, we say, as if the collection of the whisky tax, which is in the nature of a fee to insure the repression of a trade which has as it the essence of danger, has the slightest relation to the line of partisanship. He would at the same time suppress all idea of partisanship between the dividend factories and the Indianapolis platform-makers. He would annul them and many strong men without tax and without regulation to pursue their various calling.

Mr. John seems at the post while to avoid employ the usual and unjust issues Democratic as well as Democrats to suppress the enforcement.

But free whisky is not the only part of the Pacific Slope platform that Mr. John would enforce upon unfortunately than the Democratic Convention. He is a man action free trader than the most enthusiastic Democrat. Mr. John believes the Pacific Slope should be allowed to import its supplies of iron, steel, and other articles free of duty. He argues the matter which has been agreed that free tax laws are convincing to the East was the occasion to the convent
